PROFILE

Fresh Graduate Informatics Engineering with a strong interest in Artificial Intelligence, Deep Learning, and Web Development. Experienced in developing AI and computer vision solutions through academic research, industrial internships, and teaching assistance. Passionate about applying intelligent systems to solve real-world challenges in manufacturing and education.

EDUCATION

Telkom University

2022 – 2026

Informatics Engineering

- Cumulative GPA: 3.89/4.0.
- Relevant Collaborated as part of a research team on two lecturer-led Speech Emotion Recognition (SER) projects, gaining approximately one year of experience in machine learning research and experimentation.
- Served twice as a Teaching Assistant, supporting laboratory sessions, programming exercises, and student learning.

EXPERIENCES

PT Wahana Duta Jaya Rucika

Jul 2025 – Aug 2025

Maintenance Monitoring Intern

- Supported the Maintenance Monitoring team in improving machine monitoring systems within a manufacturing environment.
- Restored and enhanced the company's internal maintenance chatbot, bringing the system back into active operation.
- Troubleshoot communication issues between production machines and monitoring computers to ensure reliable machine data acquisition.
- Designed and developed an AI-powered computer vision prototype to detect fallen products on an injection molding production line, aiming to reduce product rejects and improve production quality.
- Contributed to improving the efficiency of chiller machine monitoring through system optimization.

Laboratory Assistant

Mar 2024 – Aug 2024

Algorithms and Data Structures

- Assisted instructors in delivering laboratory sessions on algorithms and data structures.
- Guided students in understanding programming concepts and solving practical assignments.
- Developed and tested laboratory modules, exercises, and projects.
- Evaluated student assignments and provided constructive feedback.

Laboratory Assistant

Oct 2023 – Dec 2023

Programming Algorithms

- Instruct and direct students regarding the tasks to be carried out.
- Provide guidance and support to students in completing their practicum assignments.

Evaluating the work results of practicum participants

Dewan Perwakilan Mahasiswa (DPM)

Sep 2023 – Feb 2024

Oversight Division Staff

- Supervise the new student orientation day at the faculty level for 2 days with a total of over 500 participants.
- Supervise Faculty BEM coordination meetings every 3 months.
- Develop SOPs for Supervision of Faculty BEM and jointly validate Faculty BEM.

PROJECTS

Online Kost System Development

Software Engineering Course Project

- Building a platform that allows people or kost seekers to search for and rent kost online.
- Analyze the best SDLC methodology for building this an Online Kost System.

Stress Detection in Tiktok Content using CNN

Gemastik Competition Project

- Collaborating with the team to develop a stress detection system for TikTok content using Convolutional Neural Network (CNN).
- The results of the model that has been created reach an accuracy level of 85.03%.

AI-based Product Fall Detection System

Intern Project

- Designed and developed an AI-powered computer vision system to detect fallen products on an injection molding production line.
- Proposed an AI-based quality inspection solution to reduce defective products in manufacturing.
- Technologies: Python, OpenCV, Deep Learning.

Fine-tuning Stable Diffusion XL using LoRA

Final Thesis

- Fine-tuned Stable Diffusion XL using Low-Rank Adaptation (LoRA) for text-to-image generation.
- Compared multiple training configurations to identify the most stable model.
- Evaluated performance using training loss and generated image quality.

PUBLICATIONS

Lecturer Evaluation from the Perspective of Speech Emotion Recognition with Deep Learning 2025

Co-author

- Developed Speech Emotion Recognition models using CNN, LSTM, and CNN+LSTM architectures.
- Achieved **96% accuracy** through MFCC-based feature extraction and deep learning.

EVENTS

INFECTION 4.0 (Informatics Students Orientation) Sep 2023

Security staff

- Ensure the implementation of regulations.
- Responsible for all security aspects of the event.

DIALOFA (Dialog Informatics Faculty) Dec 2023

Equipment Staff

- Responsible for procurement and distribution of all equipment and supplies required for the event.
- Manage equipment inventory before, during and after the event.

Content Marketing Facilitator and Speaker May 2024

Banjaranyar Community towards Self-Reliant Village Initiative

- Developed and delivered workshops and socialization sessions focused on empowering Micro, Small, and Medium Enterprises (MSMEs) through content marketing strategies.
- Provided hands-on guidance and mentoring to entrepreneurs within the Banjaranyar community.
- Collaborated with local stakeholders to tailor content marketing approaches to the unique needs and resources of the community.

ADDITIONAL

Languages: Indonesian (Native) | English (Intermediate)

Hard Skills: C++ | Python | HTML | PHP | JavaScript | TensorFlow | MySQL

Soft Skills: Problem Solving | Communication | Analytical Thinking | Teamwork
